

ARRIVAL OF THE CLIPPER SHIP War Hawk!

Progress of the War!

Important from Europe!

The clipper ship War Hawk, Capt. Simmons arrived on Tuesday afternoon, 111 days from San Francisco, bringing the American mails and expresses. She anchored in the roads, and sails

again for Hongkong to-day. By this arrival, news from Washington was received in Honolulu in thirteen days-the shortest

time yet recorded. Our latest dates are-San Francisco, Aug. 16 Washington, August 13, (telegraphic); London, August 2, (telegraphic).

The Speedwell arrived over on the 7th of Aug., 21 days passage. She would sail again about the Department during the same time. 25th instant.

The most important news from San Francisco is the burning of the steamship Golden Gate, on her passage from that port to Panama. The following is from the Bulletin:

Loss of the Steamship "Golden Gate." The steamer Golden Gate left San Francisco for Panama on the 21st of July. After a pleasant voyage of six and a half days, she took fire in the cook's galley, when 15 miles westward from Manzanillo, on the Mexican Coast. This was Sunday, July 27th. The first cabin passengers were at the dinner table, quarter to 5 P. M., when the alarm was given. ber is said to be 15,000. Thirty minutes later the steamer, which was the best one of the Company's vessels, was a total wreck. Capt. Hudson, (Commander,) assisted by Captain Pearson, who was on board the vessel as a passenger, did all that could be done to save the ship and passengers, but in spite of their best efforts 198 out of 838 on board were lost. The treasure which amounted to \$1,400,747, and it is thought about \$500,000 in Government securities were lost. Instantly that that the danger was apprehended all the women shore which was 34 miles distant. The flames spread so rapidly that many threw themselves into the sea in their panic. Others tarried by the ship until it was only a question of death by fire or by water. Some 80 persons made their escape to the shore through the breakers. Four boats were lowered, one of them was swamped instantly, the other three got It is now thought to be impossible for the vessels off. Two of them arrived safe at Manzanillo, the to escape. third, with 26 persons is not yet reported as arrived. Those who landed through breakers made their way

came to their relief. The passengers leaving San Francisco in the Golden Gate numbered 242-the officers and crew, 96 : of the whole number but 140 are known to be saved Among the latter are Captains Hudson and Pearson who were the last to leave the ship, Ben Hollady, (of Holladay and Flint,) Abel Guy, and A. J. Gunnison. The origin of the fire is quite unknown.

wearily and with much suffering over the mountain

dense with chapparel to near Manzanillo where boats

From the Eastern States, we have 17 days' telegraphic advices, during which time one severe battle has been fought at Culpepper in central Virginia, and numerous skirmishes and engagements had taken place with guerrilla bands throuhout the border states. We condense our summary of Eastern news so as to give an abstract of events in the various sections.

The Buttle of Culpepper. There was a bloody battle fought Saturday Aug. 9. six miles below Culpepper (in Culpepper county, Virginia,)18 miles north of Gordonsville and not far from the line of the Orange and Alexandria railroad. The rebels were under command of Stonewall Jackson and Ewell; the federal forces were under Banks and McDowell. The losses were heavy nearly 2,000 killed and wounded on each side. The rebel Generals an oath of allegiance to the Confederate States.] Wilder, Anger, Price and Leavy were wounded, and Gen. Banks was severely disabled by his own cavalry. The rebels retreated and at the latest accounts were still retreating towards Richmond. Jackson's retreat and return to his allegiance. is considered to be a necessity. He had evidently become aware of the trap into which he was being bepart of their force took the road to Stannardsvilleanother portion taking the other side of the moun-

tain to Gordonsville. The following is the latest from Pope. Washington, August 12 .- A dispatch from Gen. Pope states that the rebels have retreated, and that his cavalry and artillery are in pursuit across the Rapidian. The rebel army fearing their retreat would be cut off, have gone back to Orange Court ! House. Gen. Pope's is in full possession of the ground originally held by the enemy. They make a stand at Orange to prevent our advancing on Gordonsville. Pope telegraphs that he is in full pursuit of the rebels. Another battle is imminent.

Gen. Burnside has removed his forces by sea t Fredicksburg, Va., supposed to be about 20,000. A detachment from this army had destroyed a portion of the Virginia Central Railroad, thus preventing the retreat of Jackson's troops by rail to Richmond. It is said that Burnside's army is ordered to advance rapidly towards Richmond.

From M'Clellan's Army,

Under date of Aug. 5, a portion of this army took possession of Malvern Hill, an important posi-

tion on the James River, between Turkey Bend and Richmond. A portion of M'Clellan's army had been thrown across the James River onto the South Bank, as the indications were that the rebels intended evacuating Richmond and making Petersburg their headquarters. A good deal of secrecy attends the forever. This being the case, what should we do? movements of M'Clellan, and it is probable that a desperate engagement will soon take place near Richmond.

Various Telegraphic Items. Several steamers, mostly English, have been cap tured lately, attempting to run the blockade at

Charleston. Their cargoes are valued at millions. The rebel iron gunboat Arkansas has been blown up by the rebels to prevent her capture by the Union forces.

The story of 10 iron-clad ships having arrived at Mobile from England is all bosh, and probably arose from the fact that the Fingal has been fitted up as an iron-clad boat at Savannah. She was about ready

The rebel ram at Savannah is the British steam frigate Fingal, covered with railroad iron. She is armed with 14 guns, and is commanded by James P. Jones, late executive officer of the Merrimac.

W. H. Webb has contracted with the Government to build an iron steam ram, to be covered with 6-inch iron, and to have two revolving turrets like the Monitor, to be covered with 12-inch iron, and to have a solid iron ram half the length of the vessel. The price to be \$1,250,000.

The President professes to have reliable information from Richmond that the entire rebel army never exceeded 850,000 effectives, from the Potomac to the Rio Grande. The forces about Richmond reach at highest to 120,000, of whom 90,000 were on the Peninsula during the memorable seven days' fight. The Rebel loss in that fight was 28,000, killed and wounded. Richmond since has been one vast hos-

WASHINGTON, August 6 .- The Union meeting at the Capitol to night was an immense affair. A number of the most prominent and most distinguished gentlemen spoke. President Lincoln made a short speech, principally in justification of the Secretary of War, taking upon himself the responsibility of acts for which the Secretary has been blamed.

The report that Richmond is to be evacuated by the rebels and a new base of operations selected, i undoubtedly correct. They will probably move to Petersburg, so as to hold the road open for a retreat

The report that a pestilence is raging at Richmond is again asserted by a gentleman who left that city on the 1st. He says the rebel army numbers 200,-000, and are in a fearful state of destitution. The general head-quarters and a large proportion of the army has been removed to the south side of the river. Although the army is so large, the leaders find it impossible to bring more than 100,000 men in the field at one time.

FORTRESS MONROE, August 10 .- The mail boat from Harrison's Landing reports that the general appearance is that a movement of the whole or a large part of the army is taking place. Porter's Mortar fleet is still anchored at Hampton

CAIRO, August 12 -It is reported, on rebel authorty, that rebeis under Breckinridge attacked Baton Rouge, and were repulsed with heavy loss. Among the deaths were Gen. Clark, of Mississippi, and Colonel Thomas Hunt, of Kentucky.

The New York Times of Saturday gives a full list of the vessels of the navy when the war commenced. We had only 88 war vessels, while we now have 292, 55 of which are wooden and built during the past year; 28 iron-clad were also built during the year, and nearly 200 purchased and armed by the Navy

PROVIDENCE, R. I., August 5 .- Gov. Sprague has called on the colored citizens to form a regiment, as part of the queta of the State, and promises to accompany them to the field and share the perils with

Мемриів, August 2.- The enemy is reported to be in force 8 miles from here, under Bragg. Two regiments of infantry and some cavalry and artillery went out a few miles to day as advance pickets, and have not yet returned. It is expected that they will engage the enemy's pickets.

A letter to the Tribune says Gen. McClellan sent a large force across the James river on Saturdaymostly from Fitzjohn Porter's command. The num-

The following order has been issued by the War Department. It is ordered : First-That a draft of 300,000 militia be immediately made into the service of the United States, to serve nine months, unless sooner discharged. The Secretary of War will assign the quota of the States and establish regulations for

Second-That if any state shall not by the 15th o August furnish its quota of the additional 800,000f and children were ordered to the forward part volunteers as authorized by law, its deficiency in the of the ship, and the vessel headed for the volunteers of that state shall also be made up by speial draft from the militia.

Two iron-clad rams, similar to the Merrimuc, are being constructed at Charleston to destroy the blockading steamers. The Memphis and Herald had ar-The vessel grounded about 300 yards from the beach. I rived at Charleston from Liverpool with valuable supplies. The steamer Roman was also expected shortly. The fleet off Charleston has been augmented.

The Evening Post says that despatches from our Ministers abroad show the tenor of feeling of foreign Governments to be uniformly pacific.

Progress of the Slavery Question.

THE CONFISCATION BILL.-The Emancipation Bill as passed by the House of Representatives, Washingon, provides for the emmulpation of the slaves of all the following classes:

First-Of every person who shall act as an officer f the rebel army or navy. Second-Of every person who shall act as President, Vice-president, Member of Congress, Judge of any Court, Cabinet Officer, foreign Minister, Commissioner, or Consul of the so-called Confederate

Third-Of every person who shall act as Governor of a State, member of a Convention or Legislature, or Judge of any State Court of the so-called Confed-

Fourth—Of every person who, having held an office of honor, trust or profit in the United States, shall hereafter hold an office in the so-called Confed-

Fifth-Of every person who shall hold any office

or agency under the so called Confederate States, or under any of the States thereof. [But persons in the third and fifth classes must ave accepted their appointments since the date of

the Secession ordinance of their States, or have taken Sixth-Of every person not within the above classes, who, after the passage of the act, being wilfully and without compulsion engaged in armed rebellion, shall not within sixty days lay down his arms

The bill also disqualifies said six classes from holding office under the United States Government. The guiled, and retreated to escape the danger which the President is authorized to negotiate for the acquisiexecution of our plans threatened. Well informed Mexico, Central America, or South America, or in persons here assert that Gen. Pope will be in Gordons- I the islands in the Gulf, or for the right of settlement ville by Saturday at the farthest, though perhaps appropriate upon lands of said countries for all persons liberated not without fighting. When the rebels fell back a under this act, to be removed with their own consent. For the purpose of paying the expense of the purchase of lands and the removal, the President shall use such money as Congress may from time to time direct, arising out of the sales of the property formerly owned by rebels, and which shall have been confiscated to the use of the United States.

The other sections mainly relate to the machinery which the provisions of the bill are to be enforced. FREEDOM FOR THE TERRITORIES .- The President has signed the bill prohibiting slavery forever in all the Territories of the United States. As now fully

passed, the bill reads : To the end that Freedom may be and remain forever the fundamental law of the land in all places whatsoever, so far as it lies within the power or depends upon the action of the Government of the

inited States to make it so, therefore-Be it enacted, &c . That from and after the passage of this act there shall be neither slavery nor involuntary servitude in any of the Territories of the United States now existing, or which may at any time hereafter be formed or acquired by the United States, otherwise than in punishment of crimes whereof the party shall have been duly convicted.

THE RESULTS OF THE REBELLION .- Although there

was no danger of an interference with the institutions of the South for the time being, (before the rebellion) as that portion of the country had control of the Judiciary and one branch at least of the National Legislature, they must needs bring on the country all the horrors of war. They did not hesitate to initiate a strife which will ruin the loyal States, if the loyal States do not put down the rebellion, now and We say, unhesitatingly, protect ourselves at any and every cost. If it be necessary to free slaves, in orde to save ourselves from disaster, free them. The rebels have chosen deliberately their courre-certainly it was not designed to benefit us; why should we therefore make immense sacrifices to raise at our very borders a military neighbor who will ruin us? Sympathy for the men who brought this terrible war upon the country is henceforth out of place. The people are beginning to realize, that to free the negroes of rebels where life, liberty and every thing is at stake if they do not, is a very small matter, over which they should not hesitate. If rebels wish their slave property protected, let them lay down their arms. If they do not see fit to do this, they

Advices are to August 2. In the House of Commons, July, 18th, Mr. Lindsay's motion was discussed, declaring the Confederates have shown such determination to maintain their independence that the propriety of offering mediation with the view to the termination to hostilities is worthy of serious and immediate consideration of the

Mr. Lindsay was pressed to withdraw his motion, but felt it his duty to proceed. He argued strongly in its favor, as did Lord Tempest, Mr. Whiteside and

Mr. Taylor and Lord Palmerston spoke against it, the latter earnestly advising that the question be left to the Government. In the course of his speech, he treated the issue of war as a foregone conclusion, saying the only satisfactory termination that could be anticipated was an amicable separation. This, however, he thought would be impeded, rather than facilitated, by debates in Parliament. He contended that the acknowledgement of England could give no great cause of offense, but the present position of the contest did not justify the recognition of the Southern independence, and again appealed to Mr. Lindsay to withdraw his motion, which was finally done.

Sr. John's, August 9 .- The steamer Scotia, from Liverpool the 2d and Queenstown the 3d, has arrived with Archbishop Hughes as a passenger. The Independence Belge asserts that France, Prussia, and . England are negotiating for mediation in America, and that the two former have made a proposal to England, but have not yet received a final reply.

Earl Russell justifies the vigor of the Federal cruisers off the Bahamas, and the rumors are that England has sent a special envoy to Washington to urge that the President take the initiative towards peace if he wishes to avoid offers of mediation.

Paris correspondence of the London Times believes that the American question occupies the most serious attention of Napoleon, and that a Council of Ministers has been held upon it, and would not be surprised if the subject be laid before the English Government in a still more pressing manner, with the view of a speedy solution. He says: "I don't intend to say whether the movement will be followed by any immediate effect, or whether France will take the lead, with the expectation that England cannot do otherwise than follow: or whether both will act at the same time. I only know that France is convinced that the present moment is most opportune for united action." He insinuates that President Lincoln and some of his advisers would not object to some gentle

The embarkation of the French troops for Mexico was proceeding briskly.

The French have re-occupied the Roman frontier, and Garibaldi had issued his proclamation for volunteers to assemble in Sicily, announcing that the time for action had come. The destination of his expidition is unknown.

Garibaldi in the course of a recent speech delivered at Marsalla made use severel times of the phrase-"Rome or Death!" to which the people responded each time, "Rome or Death !" He also spoke in violent terms of Napoleon, and said : "We have given him Savey and Nice, and he still wants something more. He has one price ready for Rome-another for Naples.

Special Notices.

OFFICIAL. To the Friends of Education.

THE PUBLIC ARE ALREADY AWARE hat the principal building of the Seminary at Lahainaluna has been destroyed by fire. There were also destroyed at the same time a Philosophical apparatus and books belonging to the Seminary. The scholars were also sufferers. The estimate for erecting suitable buildings is \$8,000. The Legislature has appropriated \$6,000 to be applied for the erection of buildings, and it will require about \$3,000 to complete and furnish them for the purpose of the school, and to furnish a Philosophical apparatus equal to the one destroyed and to replace the books. And the Board of Education regard it a duty to appeal to the whole people of the Islands for contributions to supply the deficiency, so that this College may be put once more into successful operation. There is now an opportunity for the friends of education to render essential aid in a time of great exigency to this institution, which has been, and, I trust, will hereafter be of great service to all our people. I would suggest that the Superintendent of the schools in each district, in conjunction with the Treasurer, should take such a course as they may think most expedient, to raise a subscription for the purpose. Whatever amount may be collected can be paid to the Treasurer of each district, to be transmitted by him to the undersigned.

At an Auction sale in Charleston of recently im-

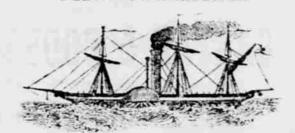

ported goods, the following prices were obtained : Turpentine soap, 50 cents per pound; tallow candles (inferior), 28 cents per pound; black tea, \$4 per pound; starch, 15 cents per pound; buckets, \$5.50 per dozen ; matches, \$9 per gross ; coffee, Laguara, 50 cents per pound ; felt hats, \$1 05 each; palm-leaf hats, 2 50 per dozen ; letter paper, assortel, 10 75 per ream; note paper, \$9 25 per ream ruled white letter paper, \$14.79 per ream; envelopes 9 50 per thousand; Coat's spool cotton, \$2.50 per dozen; bleached shirting, 84 cents per yard; black sewing silk, \$14 50 per pound; pins, \$3 50 per pack; gilt buttons, \$3 87 per gross; ladies shoes, \$4 25; men's and children's \$2,75 to \$2 37; hoop skirts, misses' and ladies', \$5 25 to \$3 each.

FIRING A MORTAR. - The firing of a mortar is the

very poetry of a battle. A bag of powder weighing from eighteen to twenty pounds is dropped in the bore of the huge monster. The derrick drops the shell in ; the angle is calculated ; a long cord is attached to the primer; the gunner steps out upon the platform, and the balance of the crew upon the shore. The Captain gives the word, the gunner gives his cord a sudden jerk, a crash like a thousand thunders follows, a tongue of flame leaps from the mouth of the mortar, and a column of smoke rolls up in beautiful fleecy spirals developing into rings of exquisite proportions. One can see the shell as it leaves the mortar, flying through the air, apparently no larger than a marble. The next you see of the shell a beautiful cloud of smoke bursts into sight, caused by the explosion. Imagineten of these monsters thundering at once, the air filled with smoke clouds, the gunboats belching out destruction, and completely hidden from sight in whirls of smoke, the shell screaming through the air with an unearth ly sound, and the distant guns of the enemy sending their solid shot and shell above and around us, dashing the water up in glistening columns and jets of spray, and you have the sublime poetry of war.
